MEDIPLAST offers DANAGRIP, an elastic support and fixation bandage with compression effect. Holes and gashes can be cut out. Can be used in single or double layers depending on desired compression. Good aeration. Very good elasticity, can be stretched 3 times its original width. The bandages are available in four different materials, unbleached cotton, bleached cotton, viscose and bamboo.

TUBULAR BANDAGE DANAGRIP BAMBOO

For Compression. Length: 10 meters unstretched.

Art.No	Description	Ward box	Trsp.box
6050951	Size A = 4 cm, small arms, legs	1	28
